

Green Buildings and Green Renovation in Slovakia

PETER ROBL, Chairman of the Board

The push of European policies

Carbon Neutrality by 2050

- The key potential of buildings
- 80 % of existing building still there in 2050
- 75 % of existing buildings inefficient

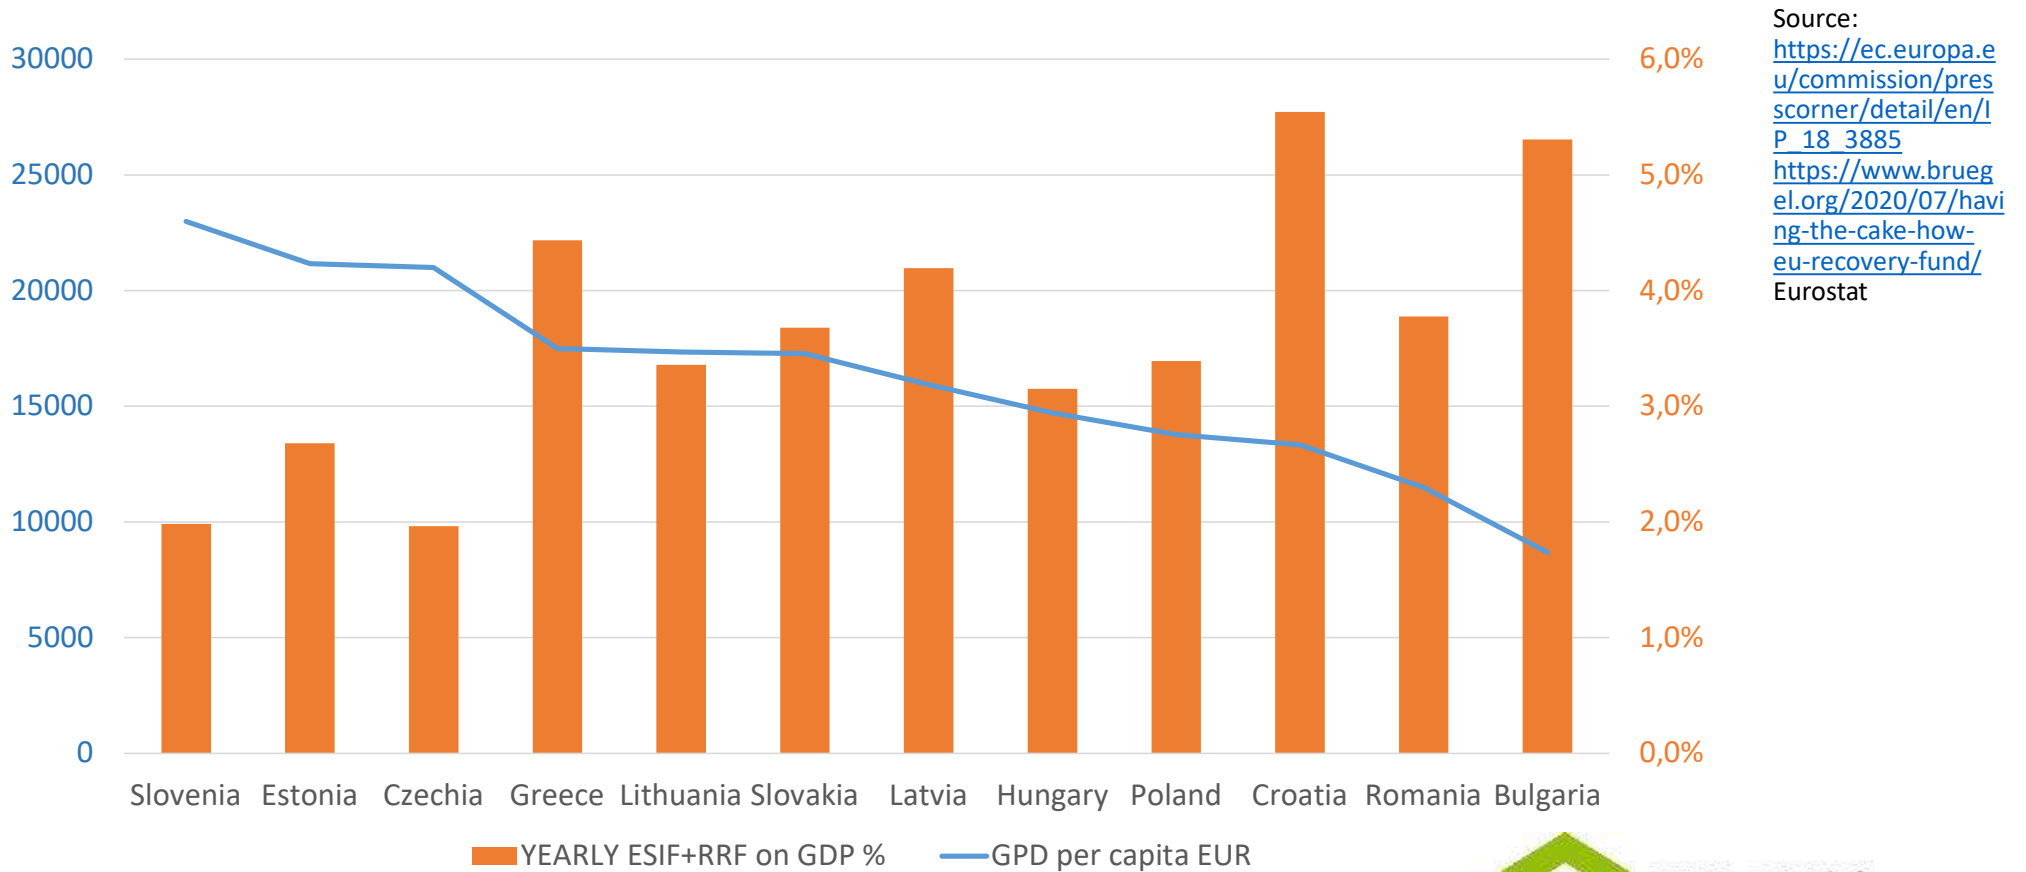

Long-Term Renovation Strategy

- Decarbonized building stock
- Ex ante conditionality for ESIF 2021 – 2027

Renovation Wave

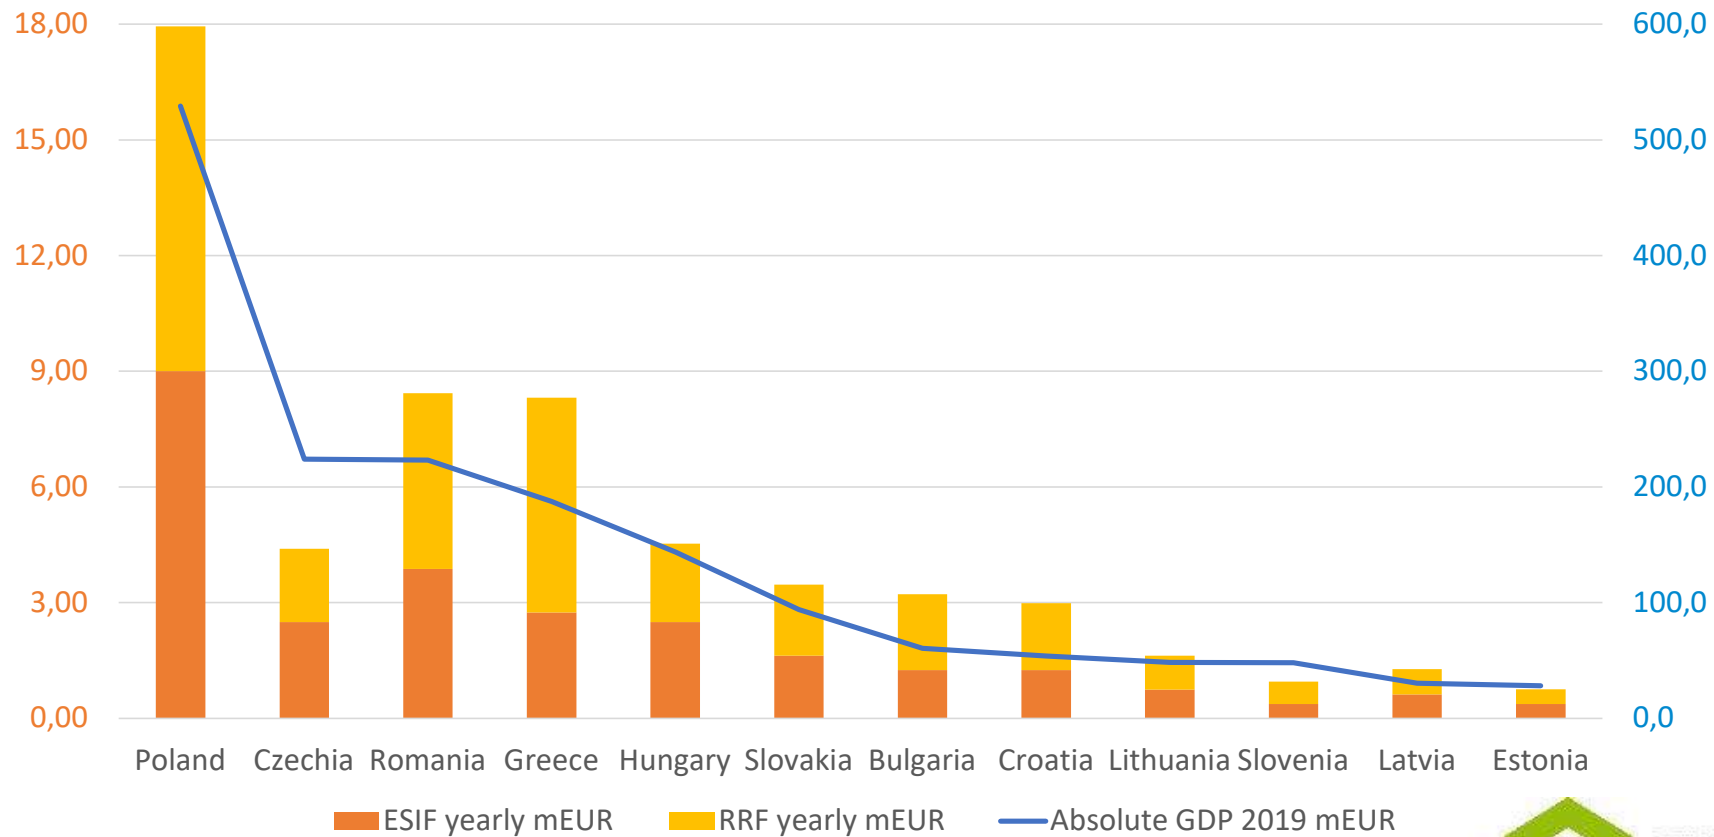

- 23 measures for 2020 – 2024
- Double renovation rate and increase uptake of deep renovations

EU funds across EE add 2-6% to GDP

Building renovation enjoys government and public support

Government manifesto

- Support EU climate policies through energy efficient and decarbonized building stock.
- Promote energy efficiency and deep renovation of buildings with focus on public buildings.

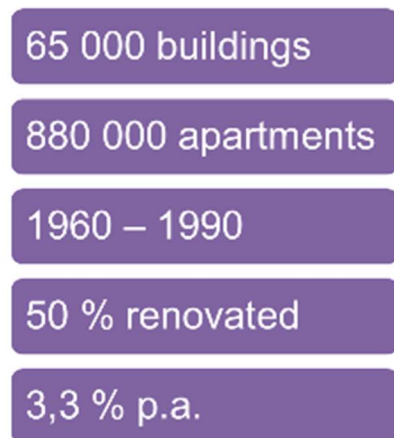

Public support

- Public poll, May 2020
- 79 % find it important that government recovery policies are climate proof
- 73 % agree that recovery program should include support to building renovation

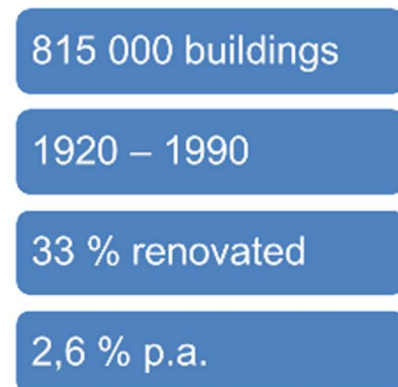

Slovak building stock and renovation programs

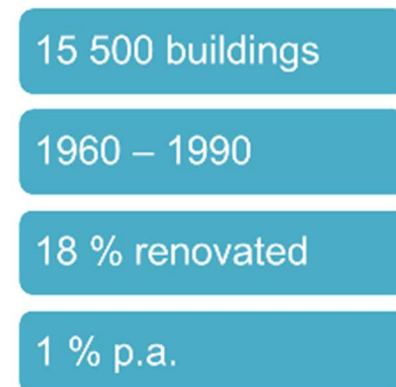

Multi-apartment

Single-family

Public buildings

Segment	Support	Budget	Funding
Multi-apartment	Soft loans; 0 % p.a.	100 mil. EUR / year	Revolving fund
Single-family	Subsidies; 40 %	30 mil. EUR / year	State budget
Public buildings	Subsidies; 95 %	450 + 750 mil. EUR / 2014-2020	EU funds

**Obnova bytového
domu na ulici Pavla
Horova v Bratislave**

Investor: SVB P.
Horova 17 – 19,
Bratislava
Projektant: TSÚS, n.
o., odborný garat
výzvy EÚ-GUGLE

SPŠ stavebná, Trenčín
